

Advanced Lumonics EarthLED CL-5

www.PumpStoreUSA.com/store/lights

PRODUCT OVERVIEW

The revolutionary CL-5 is the most powerful direct-replacement bulb that also works great in traditional lamp applications. Direct-dispersion bulb technology provides a truly natural light pattern. With a high-output 5-watt light engine, the CL-5 is our leading choice for everyday household lamp use.

The CL-5 has a lifespan of over 50,000 hours, letting you enjoy its amazing light output and energy cost savings for over 11 years! On the other hand, the incandescent that is in its place now will need to be replaced over 50 times in the same time frame.

natural light · energy savings · long life

APPLICATIONS

general illumination
desk lamps
floor lamps

tabletop lamps
bathroom and vanity lighting
ceiling fan lamps

SPECIFICATIONS

Light engines

five 1-watt CREE Power LED light engines

Luminous flux

400 lumens

Physical dimensions

overall length: 3.92 inches
length from base of socket: 3.03 inches
diameter: 2.37 inches

Beam angle

180° overall

Operating temperature

under 127°F (53°C)

Lifespan

50,000 hours or more

Construction

aluminum main housing
frosted white dispersion lenses

Base type

E27

Color temperatures

warm white and cool white

Annual operating cost

\$2.20 (12 hours per day, 365 days per year at a cost of \$0.10 per KWh)

Comparable operating cost

\$26.28 for a comparable 60-watt incandescent bulb
